

Antis

sistema giorno / day system

Alf DaFre®

Alf DaFre®

**ANTIS è un sistema libreria per la zona giorno
caratterizzato dalla libertà di scelta in altezza
e di posizione degli elementi
con la possibilità di creare molteplici configurazioni.
Ogni elemento Antis è posizionabile liberamente,
sia nel numero sia all'altezza desiderata.
La vera caratteristica della libreria è
l'esclusivo e semplice sistema di aggancio degli elementi
grazie al montante in alluminio privo di fori
o agganci prefissati, che permette di poter cambiare
nel tempo la posizione degli elementi.**

ANTIS is a bookcase unit for your living space that can be freely built. You choose the height and position of the different elements to create many configurations. Each Antis component can be positioned freely at your preferred height, and you can use as many components as you like. Most importantly, this bookcase offers an exclusive, simple hook mechanism for attaching the elements: an aluminium upright with no prefixed hooks or holes, meaning you can move things around whenever you like.

ANTIS es un sistema de librería para la zona de día caracterizado por la posibilidad de elegir libremente la altura y la posición de los elementos, permitiendo crear diversas configuraciones. Cada elemento Antis se puede colocar con libertad, en la cantidad deseada y a la altura preferida. Lo verdaderamente importante de la librería es el sistema de enganche de los elementos, exclusivo y sencillo, gracias al montante de aluminio sin agujeros ni enganches prefijados, que permite cambiar de posición los elementos más adelante.

ANTIS est un système de bibliothèque pour la zone jour caractérisé par la liberté de choix en hauteur et de position des éléments avec la possibilité de créer de multiples configurations. Chaque élément Antis peut être positionné librement, aussi bien en nombre qu'à la hauteur souhaitée. La vraie chose importante de la bibliothèque est l'exclusif et simple système d'accrochage des éléments grâce au montant en aluminium sans trous ni accrochages préfixés, permettant de changer au fil du temps la position des éléments.

ANTIS ist ein Regalsystem für den Wohnbereich, bei dem die Höhe und Position der Elemente frei wählbar ist und eine Vielzahl von Kombinationen ermöglicht. Die einzelnen Elemente von Antis können frei positioniert werden, so dass beliebig viele Elemente in jeder gewünschten Höhe miteinander kombiniert werden können. Das Besondere dieses Regalsystems ist jedoch das exklusive und einfache Befestigungssystem der Elemente mit Hilfe des Aluminiumpfosten ohne Löcher oder vorgefertigte Haken, mit dem die Position der Elemente nach Belieben geändert werden kann.

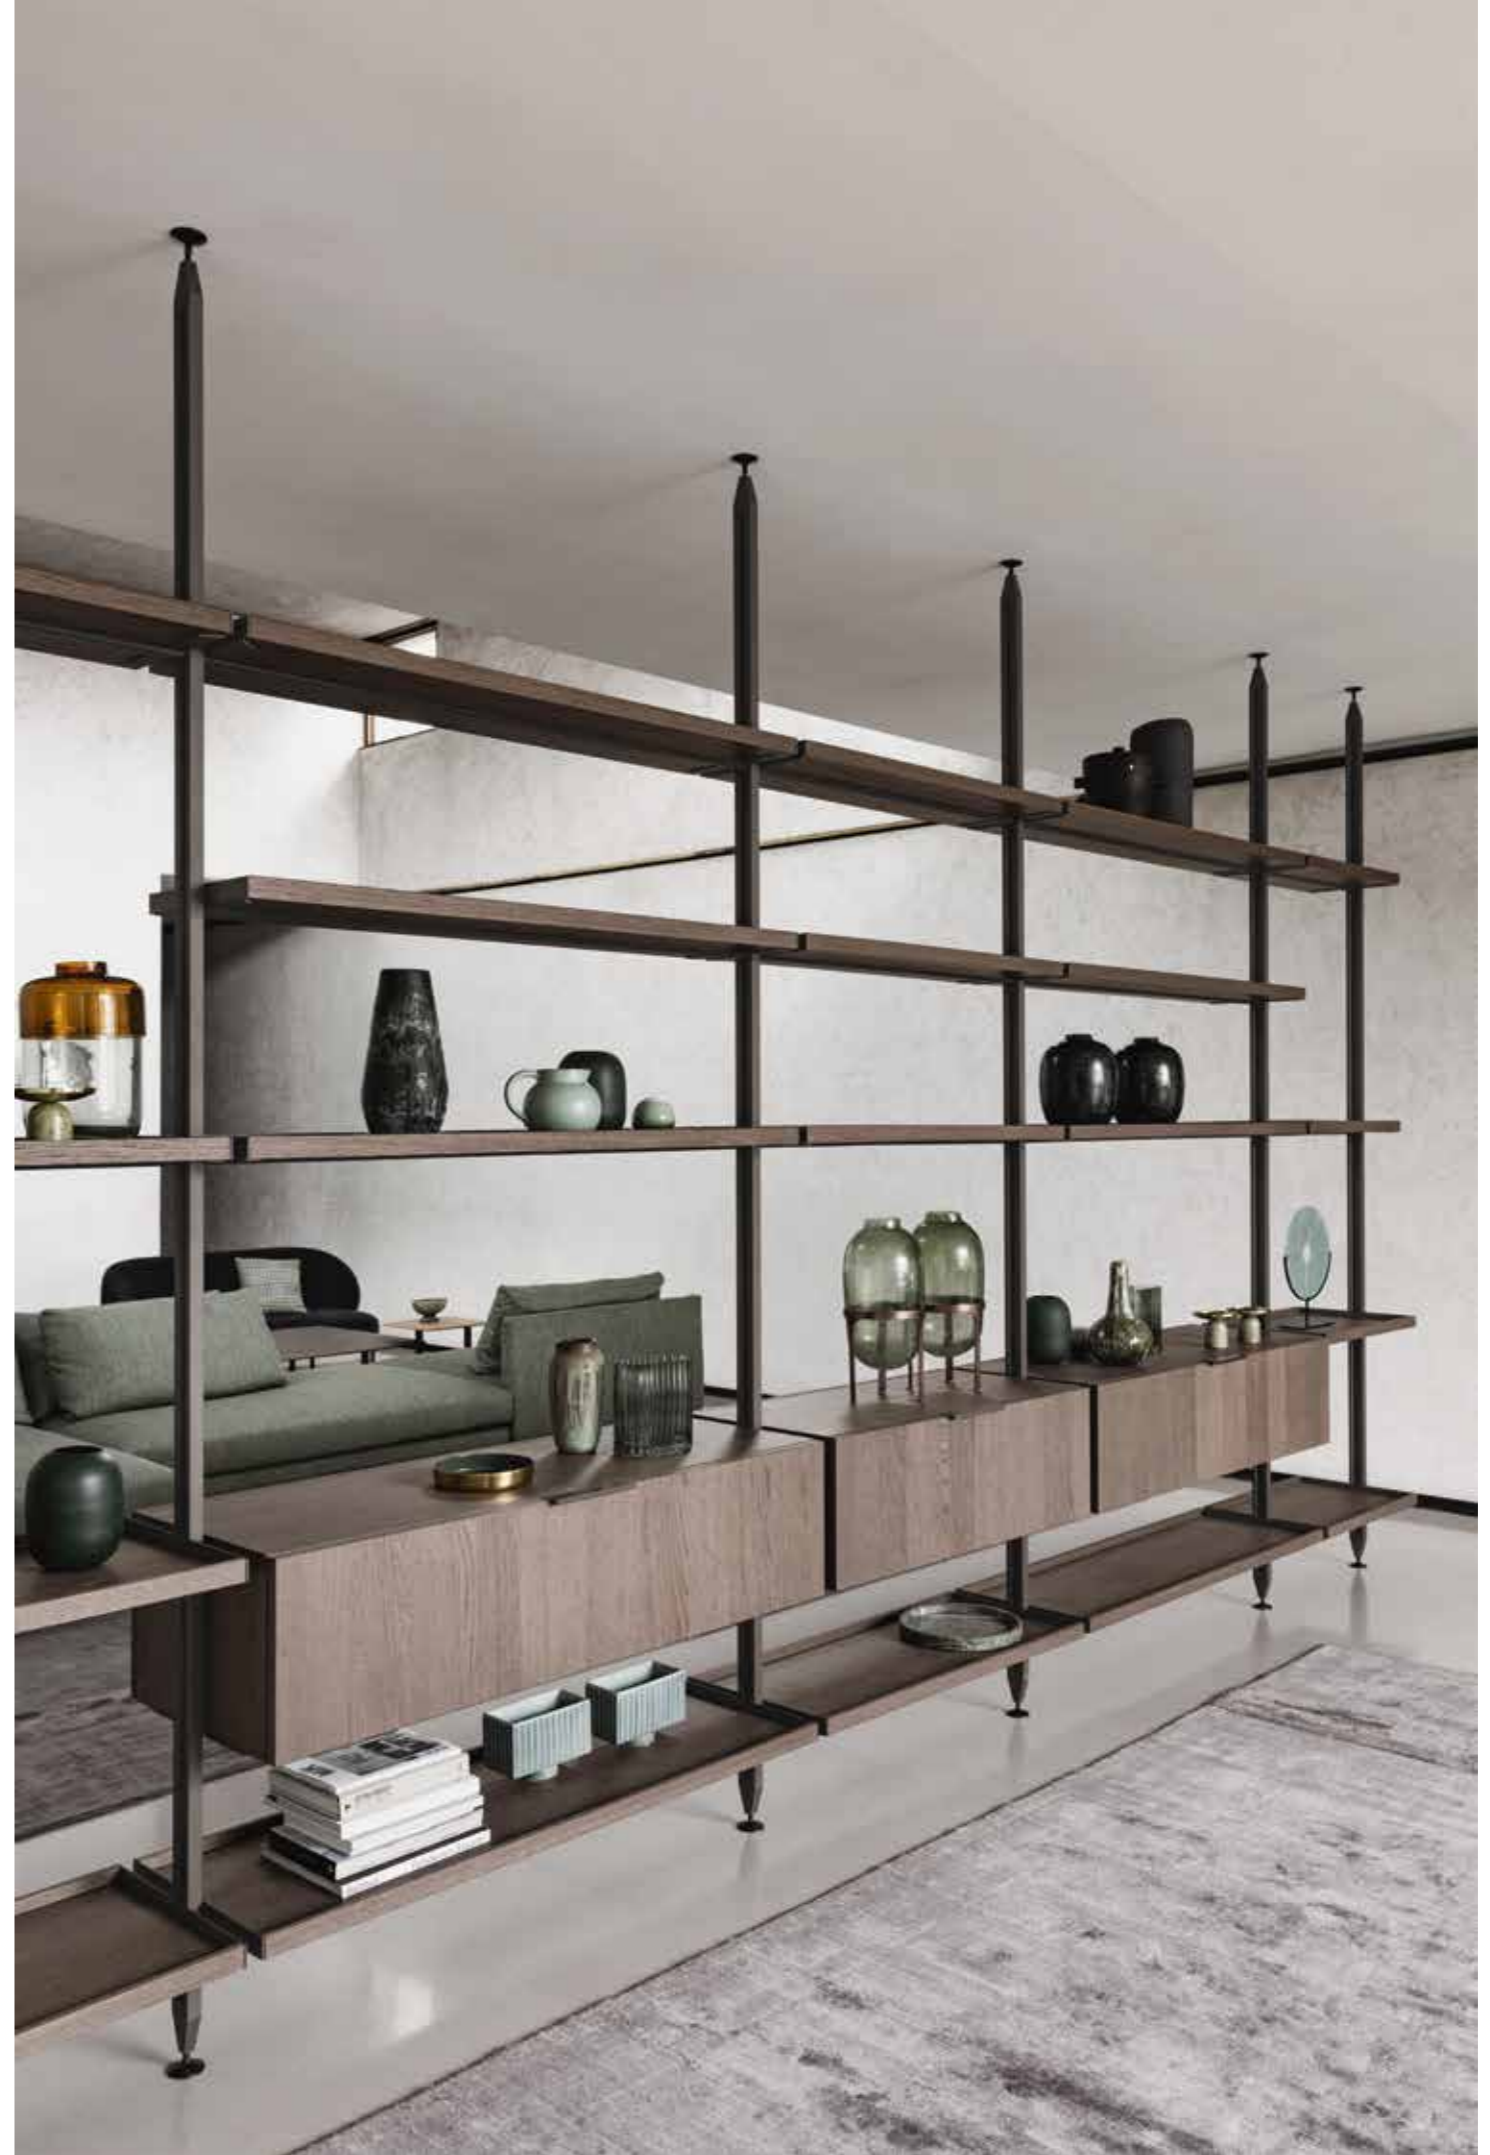

ANTIS - система книжных шкафов для гостиной, характеризующаяся свободой выбора высоты и положения элементов с возможностью создания многочисленных конфигураций. Каждый элемент Antis может быть свободно позиционирован, как в отношении количества, так и желаемой высоты. Отличительной особенностью книжного шкафа является эксклюзивная и простая система крепления элементов, благодаря алюминиевой стойке без предварительно заданных отверстий или крепежа, что позволяет со временем изменять положение элементов.
